

SVN

Installer un **client SVN** (tortoise, plugin eclipse, ou svnxs sous mac)

Créer votre dossier de travail de préférence a la **racine de votre serveur web** (dossier **www** sur wamp , dossier **htdocs** sur **Mamp** je crois)

Relier votre dossier au SVN . (SVN gérer par subversion)

URL du SVN : <https://t-a-s-ingel-bliss2013.googlecode.com/svn/>

Normalement il vous sera demander un **login et un password** .

ALLER SUR <https://code.google.com/p/t-a-s-ingel-bliss2013/source/checkout> .

Cliquer sur [googlecode.com password](#)

The screenshot shows the Google Code project page for 't-a-s-ingel-bliss2013'. The page has a navigation bar with links: Project Home, Wiki, Issues, Source, and Administer. Below the navigation bar, there are links for Checkout, Browse, Changes, and Request code review. A 'How-to' box explains that users can explore the source code by clicking 'Browse' and 'Changes'. The 'Command-line access' section provides instructions for checking out the code using HTTPS. It shows a command: `svn checkout https://t-a-s-ingel-bliss2013.googlecode.com/svn/trunk/ t-a-s-ingel-bliss2013 --username Thierry.Allardsaintalbin@gmail.com`. A red circle highlights the text 'googlecode.com password' in the instructions. Below this, it says 'When prompted, enter your generated googlecode.com password'. The 'GUI and IDE access' section states that the repository can be accessed using various client programs and plug-ins. At the bottom, a status bar indicates that the project is using approximately 0 bytes out of 4096 MB total quota. The browser's address bar shows the URL: <https://code.google.com/p/t-a-s-ingel-bliss2013/source/checkout>. The browser's search bar shows the text 'Rechercher: Pour cela il se co'. The browser's status bar shows the time 19:39 and the date 01/10/2013.

Votre **login** : votre **email gmail**

Votre **mot de passe** : s'affiche **en gras sur la page** (le mien est légèrement masqué)

This password is used by project members when checking out or committing source code changes, or when using command-line tools to upload files to the project "Downloads" tab.

For Git repositories, you can add the following line to your .netrc file recording your password for each repository domain you have commit access to. Make sure you have set the permissions on .netrc so that only your user account can read it.
